SRS Roofing Company
112 Commercial Court #25
Santa Rosa, CA.
Attn: Mr. Bob Watters

Dear Bob,

After contracting with your company, Steel Roofing Systems, for a new steel roof, I was impressed by the schedule & execution of the project on my Benicia home. From the initial permit & delivery of materials to the final sweep up, your crew knew exactly what needed to be done. They were meticulous & took care of all the little details in less than four days. The work on the two additional buildings, the pool house and the storage shed, was as good as the main roof job.

Being a licensed contractor myself, my expectations are high of the people doing work for me. Your company surpassed my expectations. I will definitely recommend your company to neighbors & anyone who asks about the roof.

You may also have people considering a roof in the area to contact me as a reference. I'd be glad to tell them how pleased my wife & I are with your workmanship & the long-term warranty.
