**Re: Steel Roofing Systems**

**To Whom It May Concern:**

**We had an old shake roof that was falling apart; we were in desperate need of a new roof. We had interviewed several roofing contractors and had pretty much decided to go with a 40-year composition roof. We asked every one of the contractors if they did steel roofs, they all said no and that they didn't know of anyone that did. Steve and I really liked the way the steel roofs look and since you can see most of our roof from the street, we really wanted a decorative look.**

**As luck would have it, Steve got free tickets to the Sonoma County Home and Garden Show; I was out of town so he went by himself. While walking around he ran into Bob Watters in the Steel Roofing Systems booth, Bob explained all about his company and showed Steve pictures of houses they have done in the area. Steve made *an* appointment for Bob to come to the house and give us *an* estimate. We signed on the dotted line right away!**

**The roofing crew run by Bob and his brother Steve were meticulous with their clean up at the end of each day, and were there every time they said they would be.**

**Our roof is beautiful; we *are* recommending Bob and Steve to anyone who is looking to get a new roof. We get people that drive or walk down our street just to come see our roof, if we *are* out front they will stop and ask questions and Steve will go into what sounds like a sales pitch. Since having our roof completed, I think we are Steel Roofing Systems best supporters. My husband and I talk about them to everyone we know.**

**Thank you Bob, Steve and crew, we love our new roof.  
Sincerely,  
Steve and Marney Allen**
