Steel Roofing Systems. Inc.
112 Commercial Ct. Suite
25 Santa Rosa, CA 95407

Dear Bob:

We are very impressed with the knowledge you have of the steel rock roof products, and the time you took to educate us on the various roof materials available. Your expertise in steel roofs verses composition was displayed in various means of information and examples you were able to produce to benefit us in our decision.

The roofs in our neighbor are large and complicated, and not your everyday install. We want to thank Steve, Jorge, Martine, and all of the crew members that worked on our roof. They were prompt, efficient, knowledgeable, accommodating, neat and truly cared that we were happy with the end result. Bob, thank you for the many times you stopped at the house to make sure the job was going as planned. We have been in the construction trade for 25 years, and appreciate a contractor that operates a professional business and supplies a superior product.

We have received many compliments on our roof by neighbors and guests. Our new steel roof is beautiful, and added an improved look to our home. Not only is the roof beautiful, but it has cooled our attic and the interior of our home as well. Last week when the temperature hit 90 degrees our home was very comfortable. We are grateful for a job well done.

Sincerely,

Richard & Jane Castle
