To Whom It May Concern,

I have just completed a fantastic experience with Steel Roofing Systems !

When it became evident that my old tired roof needed replacement, I worried that I would choose a less-than-reputable roofing contractor and have a disaster on my hands. Luckily, a friend recommended professional roofing contractor Bob Watters and Steel Roofing Systems. I now have a gorgeous steel roof that looks like tile, a home that is noticeably cooler without air conditioning, and peace of mind that the job was done perfectly by professionals.

My roofing experience with Steel Roofing Systems was professional from beginning to end. The owner, Bob Watters, came to my home at a time convenient for me, and spent two hours explaining my roofing job thoroughly, yet with no pressure sales pitch. His book of examples of roofs previously installed, and his long list of satisfied client testimonials speaks for itself. The gentlemen that actually installed my roof came early and stayed late; even on the hottest day of the job, they cleaned up any debris left around the front and back of the house. Bob's roofers are extremely competent and hard-working.

The energy efficiency of my new steel roof, as well as the 50 years and more life of this roof will pay for itself in the long run. The re-sale value of my home is now enhanced, as is its curb appeal. I strongly encourage anyone who is exploring the option of a steel roof to contact Bob Watters ; Steel Roofing Systems was the right choice for me, and I recommend them enthusiastically.
