Attn: Bob Watters

Dear Bob,

We are happy that we met you at the home show and saw your product. We were in the market for a new roof and was thinking about using composition roofing. When we saw your metal roofing material and heard you explaining the advantages of **stone coated steel roofing**, we were very interested in it.

We wanted to know more, so we visited some of the many homes you have roofed and spoke with a homeowner who was extremely pleased with her roof and the experience dealing with your company. We are also very happy with the professionalism and workmanship of your company and installers. We are delighted with the outcome of our three buildings your company roofed.

We are glad that we choose your company to roof our home, and like the comforting feeling that your product will last a lifetime and we will never need to have another roof installed. Also our homeowners insurance will decrease due to the fire rating of steel.

Thank you from another satisfied customer.

Sincerely

Wayne & Nadine Simmons
