**Bob Walters, President  
Steel Roofing Systems, Inc.  
75 Executive Avenue, Suite #13  
Rohnert Park, CA 94928**

**Dear Bob,**

**I wanted to let you know how satisfied I am with my new Metro Shingle steel roof. I did a lot research on the advantages of different roofing materials and expected my house to be cooler on a hot summer day with the steel roof and insulation under it. However I was surprised when a few weeks later it was about 94° outside at 4:30 in the afternoon and inside was a comfortable 72°. My house is well insulated and always was about 12° cooler than outside, but this made it another 10° cooler than before. My garage is not insulated and would get uncomfortably hot in the afternoon, but now it also is comfortable late in the afternoon.**

**One report I found online from Lawrence Berkeley National Laboratory, Environmental Energy Technologies Division at <http://eetd.lbl.gov/coolrooivhow.htm> indicated that asphalt shingles can make your attic temperature 72 to 90° hotter than the ambient air temperature. This I believe is about 40° hotter than the steel roof and the steel roof cools off right away after the sun goes down. It doesn't retain the heat like tile and asphalt roofs.**

**I also would like to say how nice it was to work with a local company that is right there to respond to your needs. I wanted to make some changes to my house so I could build a cover over my patio and attach it to a Fascia board. With your company, this was no problem.**

**Your foreman Carlos, was very professional, made sure everything was done properly and always cleaned up the area at the end of every day. It was a pleasure to work with him. And finally I want to say how much I appreciated the personal attention you gave to my job. You were always available and I liked the way you explained the benefits of the design of Metro Shake over other brands.**

**Several of my neighbors have commented how well the house looks now and I see a house down the street is also getting one of your steel shake roofs. I would recommend your company to anyone who wants a quality roof and an honest, company.**

**Sincerely,**

**Dennis Blasi**
