100 Professional Center Dr. Suite #10
RohnertPark, Ca. 94928*

Joel, Steve, & Crew,

First, let me say, that our new roof is beautiful! The whole experience from beginning to end, was professional, on time, and considering having three workers on your roof using hammers etc., not as bad as I had imagined. I personally found the SRS system to be interesting, from a construction standpoint, and as I was on vacation, observed the process in total.

As a San Francisco Fireman for 29 years, and living in an area of Santa Rosa where "Shake Roofs" are considered a fire hazard, I was very concerned with what type of roofing material to use, as many are available. After hearing Joel Neffs presentation, and answering all my questions especially regarding fire hazard, I decided and felt very comfortable with having an SRS roof installed over our existing "Shake" roof I am very happy with my decision, and would advise anyone interested in re-roofing, to listen to the SRS presentation.

Sincerely,

*Jan & Dave Grainger
